TypingPractice.ai

Student data privacy fact sheet

Updated 17 November 2026
typingpractice.ai/schools/privacy

THE SERVICE

Free typing practice on the web: lessons, adaptive practice, typing tests, kids' story adventures, a daily passage, live class races and class contests. No ads today, and never ads to students. Students need no accounts.

Beyond Star Technology LLC, 285 W Wieuca Rd NE STE 60841, Atlanta, GA 30342 · support@typingpractice.ai

WITHOUT AN ACCOUNT

- Practice progress stays in the browser on that device.
- Class races: a code and a typed first name, held in memory while the race runs, then gone.
- Contests: a code and a first name or nickname; the name and best result are kept until 30 days after the contest closes.
- Anonymous usage events: no name, account or lasting ID; none if the browser sends GPC or Do Not Track.

WITH OPTIONAL GOOGLE SIGN-IN

Name, email address, profile picture link and Google account ID; sign-up and last sign-in dates; country of last sign-in; whether the domain looks like a school's, and the answer if the user says they teach; the typing profile (timings per key, speed per word, rounds, bests, badges, settings). Google shares only `openid`, `email` and `profile`. The public daily board shows a school account by its initial only.

NEVER COLLECTED

Passwords, addresses, phone numbers, birth dates, grades, class lists, student IDs, photos, recordings, chat or students' writing. IP addresses are never stored or logged. Students are never emailed.

COMPANIES THAT PROCESS DATA

- **Amazon Web Services**: hosting: our servers, our database, its backups and the delivery of pages.
- **Google**: sign in with Google, for those who use it, and our support inbox.
- **OpenAI**: optional AI features: AI practice text, the AI coach and AI-written kids' stories.
- **Twilio SendGrid**: tip emails to teachers who ask for them.
- **Grafana Labs**: our internal dashboards.

HOW LONG DATA IS KEPT

- **Practice progress without an account**: in the student's browser only; never uploaded.
- **Class race names and results**: race server memory while the race runs; never stored.
- **Contest names and results**: deleted 30 days after the contest closes; the typing itself is never kept.
- **Student accounts**: until deletion is asked for; at most 12 months after the last sign-in.
- **Other accounts, including teachers'**: until deletion is asked for; at most 24 months after the last sign-in.
- **Daily passage results**: 90 days.
- **Anonymous usage events**: 25 months; the daily visitor-code key, one day.
- **IP addresses**: never stored or logged.
- **Server logs**: 30 days; no names, emails or IP addresses.
- **Database backups**: encrypted, 7 days.

SECURITY

- HTTPS everywhere (TLS 1.2+).
- Database in the US (AWS, Northern Virginia), encrypted at rest, not reachable from the internet, TLS-only connections.
- Encrypted backups, kept 7 days. Own database, shared with no other product.
- Account data seen only by the person who runs the site; read-only admin view, every look recorded.
- Written security program, reviewed yearly; breach notice to the school within 72 hours of confirmation.

AGREEMENTS AND LAWS

- We sign the SDPC National Data Privacy Agreement or your state's version, with Exhibit E, at no cost, within two weeks.
- FERPA: we act as a school official, using student data only to provide the service.
- COPPA: under-13s need no account; for school sign-ins the school consents to the educational use.
- Never ads to students or targeted ads; no sale of data; no marketing to students.
- Copies, corrections and deletions (a whole email domain at a time) within 30 days.

FOR YOUR IT TEAM

Allow: `typingpractice.ai, www.typingpractice.ai`: the site; `race.typingpractice.ai`: class races, over a secure WebSocket (wss://); `api.typingpractice.ai`: anonymous usage counts, never linked to a student; `accounts.google.com`: only for signing in, which class races don't need. Google OAuth client ID: `1011387335638-f5008ha41os3bv5lffhe5l0kibs1m93j.apps.googleusercontent.com`
