For your district's review

TypingPractice.ai

A teacher would like to use TypingPractice.ai with students. These are the facts a district usually checks, as of November 17, 2026.

What it is	A free typing practice site: lessons from the home row up, typing tests, practice that adapts to each typist, and class typing races and typing contests that a teacher runs.
Cost and ads	Free. No ads, no third-party trackers, no social media widgets and nothing to buy.
Student accounts	None needed. Lessons, practice and tests work without signing in. Students join a class race or a contest with a code and a first name or nickname.
Class races	Names stay in the race server's memory while the race runs and are never written to our database. Our usage counts record the race's numbers, never a name.
Contests	Each entrant's first name or nickname, division and results are kept until 30 days after the contest closes, then deleted. The teacher can delete a contest sooner. The typing itself is never kept.
Optional sign-in	Signed in, we keep a name, email address, profile picture link and typing progress. Accounts are deleted 12 months after the last sign-in for a school account that isn't a teacher's, and 24 months for any other. Daily passage results go after 90 days, anonymous usage events after 25 months.
Where data is kept	In the United States, with Amazon Web Services (us-east-1). Pages are delivered through Amazon CloudFront.
Companies that handle data	Amazon Web Services (hosting and database), Google (sign-in and our support inbox), OpenAI (only the AI practice requests, when an AI feature is used), SendGrid (tips emailed to teachers who ask for them) and Grafana Labs (our internal dashboards). Students are never emailed.
Never	We don't sell data, show ads, use student data for targeted advertising, or build profiles of students beyond their own practice.
Security	HTTPS only, with HSTS. The database is encrypted at rest and can't be reached from the internet. Encrypted backups are kept 7 days.
Deleting data	Email support@typingpractice.ai. We handle a school's deletion request by hand within 30 days.
Accessibility	We aim for WCAG 2.1 AA. What we tested, and the known exceptions, are at typingpractice.ai/accessibility.
